

CAREER SUPPORT @ METIS

Our goal is to prepare you for success as a data scientist – and our measure of that success is your employment upon graduating from the Data Science Bootcamp. We are committed to providing you with the support and tools you need in order to get there, and that commitment does not end until you've landed the job.

OUR COMMITMENT:

- 01 | Individualized Support and One-On-One Meetings:** Throughout the bootcamp, as well as during post-graduation support, you have opportunities to meet with your Career Advisor. The purpose and outcome of each meeting will be different for every student, but some of the most frequent topics we discuss and/or review are resumes, LinkedIn profiles, salary negotiation, mock interviews, company introductions, crafting messages to hiring managers and recruiters, and soft skill interviewing. We hold three meetings with you, during weeks 2-3, 9-10, and approximately 4 weeks after Career Day (see *Post-Graduation Support*).
- 02 | Speakers and Events:** During the bootcamp, you are exposed to a number of speakers, including ones from our Hiring Network. These speakers provide deep-dives into specific skills and/or career coaching advice and represent excellent opportunities to expand your knowledge, gain insider career information, meet potential hiring managers, and expand your data science network.
- 03 | Workshops:**
- LinkedIn:** We teach you how to build a LinkedIn profile that is specifically suited for data science jobs. Learn how to incorporate your previous work experience and how to best position yourself for competitive opportunities.
 - Networking:** We throw a mock networking event (attended only by members of your cohort) to help you learn how to navigate – and build confidence to attend – industry events and Meetups.
 - Resumes:** You learn how to craft a professional resume that is ready to present to employers at Career Day.
 - Interview Preparation:** You learn the dos & don'ts of the interview process, including important tips to help you achieve successful interviews.
 - Data Science Career Paths:** You learn the difference between Data Scientist, Data Analyst, and Data Engineer opportunities – and find out what might be the best fit for you.
 - Salary Negotiation:** We share the latest data scientist salary information and walk you through salary negotiation best practices.
- 04 | Mock Interviews.** Toward the end of the bootcamp, you participate in a mock technical interview conducted by data scientists from the Metis Hiring Network. You have the opportunity to “whiteboard” and respond to typically asked data science questions. Afterward, you get feedback on your performance.
- 05 | Career Day Preparation:** Leading up to Career Day, you have multiple opportunities to demo your final project in front of Metis staff, students, and instructors, and you'll receive personalized feedback to help you better prepare for Career Day.
- 06 | Career Day:** During your final week, we host Career Day, at which you're introduced to companies actively hiring for data scientists. You present your final project and network with attendees throughout the event. Participating companies have included Capital One Labs, Booz Allen Hamilton, Spotify, Zynga, and HBO.
- 07 | Post-Graduation Support:** After you graduate – and until you are employed – you can expect to receive:
- An invitation to join Employ, a platform that allows Metis and Dev Bootcamp graduates to connect with hiring companies.
 - An invitation to join the Metis Alumni Network, which puts you in touch with all Metis alumni.
 - Access to the Alumni Resources folder.
 - Links to job openings, events, and job searching articles and resources. (These are shared via the messaging service Slack.)
 - Information on specific job opportunities that we think will be a fit for you based on geographic or industry preference, or because of the employer's preference for certain skills or work experience.
 - An optional one-on-one meeting with your Career Advisor.

YOUR COMMITMENT:

1. Participate in one-on-one meetings
2. Attend speaker and event activities
3. Attend workshops
4. Respond to Careers Team in a timely manner (within 48 hours)
5. Adhere to deadlines for completing career-related tasks

We are excited to work with you!
