I'm Leon

**Medium, Wordpress, Blogger,
Static Hosting, Tumblr,**

... (the list goes on)

Static Hosting with Hugo

How to Do?

Create and clone your
blog and **github.io**
repositories on GitHub

How to Do?

**Pick a theme, and
download the content
locally to your blog
repo**

How to Do?

**Personalize the
config.toml, content,
css, layout, et cetera
(locally)**

How to Do?

Test it out locally
using **hugo server**

How to Do?

Empty the public folder (first time only), and create a git submodule on GitHub

How to Do?

**Build your site,
commit changes,
then publish (push)**

How to Do?

Import into Medium

All Done!
